

## Child's River

Trail Length: 1.2 miles

Parking: Located on Brown (Milford) Road

Child's River Conservation Area is located in the Mashpee National Wildlife Refuge. The area consists of abandoned cranberry bogs (known as the 'Garner Bogs') down an old bog-access road. Witness the freshwater marsh conditions in the old bog ditches, where plants such as cattails and cardinal flowers grow, now that cranberry operations have ceased. Child's River used to flow out of the south side of Johns Pond; now the river outlet is the Quashnet River at the north side.
